in n out employee handbook: A People's Guide to Orange County Elaine Lewinnek, Gustavo Arellano, Thuy Vo Dang, 2022-01-25 At first encounter, Orange County can resemble the incoherent sprawl that geographer James Howard Kunstler named *The Geography of Nowhere*: a car-dependent, seemingly bland space designed most of all for efficient capitalist consumption. But it is somewhere, too, and learning its stories helps it become more than its boosters' slogans. Writers Lisa Alvarez and Andrew Tonkovich, residents of Orange County's remote Modjeska Canyon, describe this whole county as a much-constructed and -contrived locale, a pestered and paved landscape built and borne upon stories of human development... of destruction as well as, happily, of enduring wild places. In a similar vein, essayist D. J. Waldie, chronicler of the bordering suburb of Lakewood, asserts that becoming Californian ... means locating yourself in habitats of memory that connect ordinary, local areas with broader themes. Moving beyond sentimentality, nostalgia, and so many sales pitches that omit far too much, Waldie echoes Michel de Certeau's call to awaken the stories that sleep in the streets. That is the goal of this book. Inspired by Laura Pulido, Laura Barraclough, and Wendy Cheng's *A People's Guide to Los Angeles* (University of California Press, 2012), as well as the *People's Guides to Boston* and *San Francisco* that have followed it, we offer this guidebook for locals, tourists, students, and everyone who wants to understand where they really are. This book is organized with regional chapters, sorted roughly north to south by community. Within each city, sites are listed alphabetically. After the group of entries for each city, we recommend nearby restaurants as well as other sites of interest for visitors. Readers may explore this book geographically or use the thematic tours in the appendix to consider environmental politics, Cold War legacies, the politics of housing, LGBTQ spaces, or Orange County's carceral state. The appendix also contains suggestions for teachers using this book, engaging students in cognitive mapping, close reading, popular-culture analysis, and creating additional entries of people's history. While many local histories tend to focus on a few white settlers, this book places attention on the people, especially the subaltern ones who are hierarchically under others, including workers, people of color, youth, and LGBTQ individuals. No single book can represent an entire county, so we have chosen to concentrate on the lesser-known power struggles that have happened here and influenced the landscape that we all share. We could not include everyone, of course. We are mindful that other groups are currently creating more people's history on this landscape that we hope our readers will continue to explore. In Orange County, excavating the diverse past can be frowned upon or actively repressed by those invested in selling Orange County in the style of its booster Anglo settlers from 150 years ago. This book tells the diverse political history beyond the bucolic imagery of orange-crate labels. We hope it will inspire readers to further explore Orange County and reflect on even more sites that could be included in the ordinary, extraordinary landscape here--

in n out employee handbook: Encyclopedia of Junk Food and Fast Food Andrew F. Smith, 2006-08-30 Eating junk food and fast food is a great all-American passion. American kids and grownups love their candy bars, Big Macs and supersized fries, Doritos, Twinkies, and Good Humor ice cream bars. The disastrous health effects from the enormous appetite for these processed fat-and sugar-loaded foods are well publicized now. This was particularly dramatically evidenced by Super Size Me (2004), filmmaker Morgan Spurlock's 30-day all-McDonald's diet in which his liver suffered the same poisoning as if he had been on an extended alcohol binge. Through increased globalization, American popular food culture is being increasingly emulated elsewhere in the world, such as China, with the potential for similar disastrous consequences. This A-to-Z reference is the first to focus on the junk food and fast food phenomena from a multitude of angles in addition to health and diet concerns. More than 250 essay entries objectively explore the scope of the topics to illuminate the American way through products, corporations and entrepreneurs, social history, popular culture, organizations, issues, politics, commercialism and consumerism, and much more. Interest in these topics is high. This informative and fascinating work, with entries on current controversies such as mad cow disease and factory farming, the food pyramid, movie tie-ins, and marketing to children, will be highly useful for reports, research, and browsing. It takes readers behind the scenes, examining the significance of such things as uniforms, training, packaging, and franchising. Readers of every age will also enjoy the nostalgia factor, learning about the background of iconic drive-ins, the story behind the mascots, facts about their favorite candy bar, and collectables. Each entry ends with suggested reading. Besides an introduction, a timeline, glossary, bibliography, resource guide, and photos enhance the text.
