my world interactive social studies: Interactive World, Interactive God Carol Rausch Albright, John R. Albright, Mladen Turk, 2017-11-06 Since the dawn of science, ideas about the relation between science and religion have always depended on what else is going on in a society. During the twentieth century, daily life changed dramatically. Technology revolutionized transportation, agriculture, communications, and housework. People came to rely on scientific predictability in their technology. Many wondered whether God's supposed actions were consistent with scientific knowledge. The twenty-first century is bringing new scientific research capabilities. They are revealing that scientific results are not totally predictable after all. Certain types of interaction lead to outcomes that are unpredictable, in principle. These in turn may lead to a whole new range of potential interactions. They do not rule out the reality of a dynamic God who can act in the world without breaking the known principles of science. God may in fact work with the way things really are. Human experience of God may accurately reflect this reality. Interactive World, Interactive God illustrates such new understandings in religion and science by describing recent developments in a wide range of sciences, and providing theological commentary. The book is written for intelligent readers who may not be specialized in science but who are looking for ways to understand divine action in today's world.

my world interactive social studies: Getting To Grips With Science: A Fresh Approach For The Curious Andrew James Morris, 2014-12-10 Science touches all of our lives, every day, and should be a constant source of wonder and fascination — not something confined to the classroom. This book is for anybody who feels curious about ideas in science but lacks a strong background in the subject. Getting to Grips with Science draws on the author's twelve years of experience in leading experimental discussion groups, where people from all walks of life come together to pose questions in the presence of a science teacher. Bursting with testimonials from real people about their everyday experiences of science, the book acts as a gentle introduction for anyone wishing to find out more about the natural world. Drawing on practical examples and discussions that range from hormones to tectonic plates, it helps the reader understand any difficulties they may have encountered with science learning in the past and points to fresh ways of approaching the subject in the future. Concentrating on the themes that non-scientists are genuinely curious about, the book illustrates how we can begin to explore scientific ideas, first through our initial understanding of the world around us and then with the help of a trained tutor who explains the underlying scientific concepts. For those wishing to make a start on exploring science afresh, the book offers practical information about the books, museums, websites, podcasts, courses and events available to support them. Wider reflection on the experience of adults engaging with science through these discussion groups offers food for thought on the nature of science education in general. Andrew Morris has been running science discussion groups in informal settings in central London since 2002. Originally a science teacher in sixth-form, further and adult education, he has also worked as a senior manager in colleges and national bodies concerned with educational research.

my world interactive social studies: *Narrative and Experience in Multicultural Education* JoAnn Phillion, Ming Fang He, F. Michael Connelly, 2005-03-23 *Narrative and Experience in Multicultural Education* provides compelling stories that raise questions, advance understandings, and promote insight into the challenges and hopes of teaching for diversity and democracy. The works contained are compelling for the stories they tell and, as such, there is value in their presence. That the thoughtful reader can glean important lessons with respect to multicultural education and the value of narrative inquiry as academic disciplines is intellectual 'icing-on-the-cake.' —Francisco Rios, University of Wyoming This work is a very exciting, important, and badly needed piece of scholarship offered by some of the most leading-edge professors in the field. The diversity and diverse viewpoints it presents are unparalleled in the field of education. —Cheryl J. Craig, University of Houston The narratives in this book allow readers to put a human face to an issue related to multicultural education. A reflective reader will begin to see himself/herself in the narratives of the text. —Edmundo F. Litton, Loyola Marymount University The inclusion of chapters that deal with classroom realities elevate the text for education teacher candidates above those existing volumes that tend to deal with multi/inter-cultural issues in the abstract. One of the strengths of this volume is that it will resonate with new and experienced classroom practitioners. —Jon G. Bradley, McGill University *Narrative and Experience in Multicultural Education* explores the untapped potential that narrative and experiential approaches have for understanding multicultural issues in education. The research featured in the book reflects an exciting new way of thinking about human experience. The studies focus on the lives of students, teachers, parents, and communities, highlighting experiences seldom discussed in the literature. The authors are diverse and their inquiries are far ranging in terms of content, ethnic groups studied, and geographic locations. They also bring their personal experience to the inquiries, actively

participate in the lives of the people with whom they work, care deeply about the concerns of their participants, and search for ways to act upon these concerns. Most importantly, the work emphasizes the understanding of experience and transforming this understanding into social and educational significance. Key Features • Addresses new ways to explore multicultural issues in education; rather than relying on theoretical generalizations, the book focuses explicitly on individual and group experiences • Emphasizes the transformation of experience into education, especially through the study of complex multicultural issues • Challenges readers' assumptions of multicultural issues by offering numerous narrative accounts and research studies for work with various ethnic groups Narrative and Experience in Multicultural Education is designed for use in courses in multicultural education and qualitative research, especially in departments of education, anthropology, and sociology. Professional educators, researchers, and consultants will also find this a valuable introduction to narrative research and a welcome addition to the literature.

Tamdgidi, 2002-03-01 The essays gathered in this debut (I, 1, Spring 2002) issue of Human Architecture: Journal of the Sociology of Self-Knowledge were written by undergraduate students enrolled in various sociology courses offered at SUNY-Binghamton and SUNY-Oneonta. the issue also includes the editor's paper on K. Mannheim, where the idea of a sociology of self-knowledge was born. What these courses shared was their common use of the sociology of self-knowledge as a strategy for learning about their respective subject matters. Each course required students to engage throughout the semester in an ongoing self-exploratory sociological research focusing on a specific unresolved issue, problem, or question still facing their everyday lives. They were required to link their self-explorations to the study of society at large through various course and outside readings and films studied in class throughout the semester. Topics were: "The Capitalist Cuckoo's Nest," "I only Thought I Knew It All: Society and the Individual," "Why Is P Afraid to Love a Woman?," "Teacher Recruitment and Retention: Personal Conflicts, Social Dilemmas," ""Alien Nation,""" "Good Mother/Daughter Hunting: A Process of Self-Healing," "For the Love of Our Many Lives," "Banana or Bridge? my world interactive social studies: Making People Pay Sibichen K. Mathew, 2013-08-14 Can a complex subject like tax compliance be handled in such a simple manner? Sibichen K Mathew is successful in presenting his in-depth study on what makes people pay taxes or what prevents them from paying in a very interesting style. The Author takes us through the history, the economics and the politics of taxation to dissect the interconnected issues related to tax evasion and tax enforcement. He forcefully argues that the economic models are unable to fully explain the behaviour of taxpayers. For, if the tax laws are complex, the human mind is much more complex to yield to the economic models. His arguments are supported by data on attitudes, perceptions and experience of taxpayers, many of whom declare themselves to be tax evaders. The author also analyzes the sociological and economic causes and consequences of tax evasion and tax enforcement in the global context. The author has also briefly referred to the tax challenges thrown up by the integrated world economy. The solution offered is scaling up of international cooperation on a significant scale. The insights gained from these incisive analyses have enormous implications for policy makers as well as tax administrators all over the world. The taxpayers, tax practitioners and the students of social sciences would also find this book enriching.
