The Scope of Modern Times in World History

In the context of Glencoe's world history series, "modern times" typically covers a period beginning with the Renaissance and Reformation, stretching through the Age of Exploration, the Enlightenment, Industrial Revolution, imperialism, and into the 20th and 21st centuries. This broad scope allows students to see how historical forces have transformed societies from feudal systems to the interconnected global community we recognize today.

One of the strengths of Glencoe's approach is its ability to connect distant events and explain their relevance. For example, understanding how the Enlightenment influenced political revolutions or how industrialization reshaped economies worldwide provides students with a cohesive grasp of history's dynamic flow.

Key Themes Explored in Glencoe World History Modern Times

Political Revolutions and Social Change

From the American Revolution to the French Revolution and beyond, Glencoe World History Modern Times delves into the powerful wave of political upheavals that redefined governance and individual rights. These revolutions often serve as focal points for discussing ideas such as democracy, nationalism, and human rights.

The textbook highlights how these changes didn't occur in isolation. For instance, the influence of Enlightenment thinkers like John Locke and Rousseau is woven into the narrative to explain how philosophical ideas fueled demands for liberty and justice. Additionally, the social consequences of these revolutions — including shifts in class structures and gender roles — are thoroughly examined.

Industrialization and Economic Transformation

Another pillar of modern history covered extensively in Glencoe's materials is the Industrial Revolution. This era marked a dramatic shift from agrarian economies to industrial powerhouses, fundamentally altering how people lived and worked.

The resource explores technological innovations, urbanization, and the rise of capitalism, while also addressing the darker sides of industrialization such as labor exploitation and environmental impacts. It encourages learners to consider both the progress and challenges brought by these changes, offering a balanced perspective that is crucial for deep historical understanding.

glencoe world history modern times: *The New Politics of the Textbook* Heather Hickman, Brad J. Porfilio, 2012-10-13 In an age of unprecedented corporate and political control over life inside of educational institutions, this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K-16 schools to perpetuate their interests at the expense of minoritized social groups. The contributors provide a comprehensive examination of

how textbooks, the most dominant cultural force in which corporations and political leaders impact the schooling curricula, shape students' thoughts and behavior, perpetuate power in dominant groups, and trivialize social groups who are oppressed on the structural axes of race, class, gender, sexuality, and (dis)ability. Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism, militarism, consumerism, White supremacy, heterosexism, rugged individualism, technology, and a positivistic conception of the world. Finally, the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other, to reflect upon the constitutive forces causing oppression in schools and in the wider society, and to reflect upon how to challenge corporate and political dominance over knowledge production.

glencoe world history modern times: The 'Other' Students Dina C. Maramba, Rick Bonus, 2012-12-01 Though the Filipino American population has increased numerically in many areas of the United States, especially since the influx of professional immigrants in the wake of the 1965 Immigration Act, their impact on schools and related educational institutions has rarely been

documented and examined. *The Other Students: Filipino Americans, Education, and Power* is the first book of its kind to focus specifically on Filipino Americans in education. Through a collection of historical and contemporary perspectives, we fill a profound gap in the scholarship as we analyze the emerging presence of Filipino Americans both as subjects and objects of study in education research and practice. We highlight the argument that one cannot adequately and appropriately understand the complex histories, cultures, and contemporary conditions faced by Filipino Americans in education unless one grapples with the specificities of their colonial pasts and presents, their unique migration and immigration patterns, their differing racialization and processes of identity formations, the connections between diaspora and community belonging, and the various perspectives offered by ethnic group-centered analysis to multicultural projects. The historical, methodological, and theoretical approaches in this anthology will be of interest to scholars, researchers, and students in disciplines which include Education, Ethnic Studies, Asian American and Pacific Islander Studies, Anthropology, Sociology, Political Science, Urban Studies, Public Policy, and Public Health.
