These designations in media can have far-reaching repercussions in shaping not only language, but also cognitive activity and behavior. The meaning attached to biological, numerical age—even the mere fact that we calculate a numerical age at all—is culturally determined, as is the way people “act their age.” With populations aging all around the world, awareness of intergenerational relationships and associations surrounding old age is becoming urgent. *Connecting Childhood and Old Age in Popular Media* caters to this urgency and contributes to age literacy by supplying insights into the connection between childhood and senescence to show that people are aged by culture. Treating classic stories like the Brothers Grimm's fairy tales and Heidi; pop culture hits like *The Simpsons* and *Mad Men*; and international productions, such as Turkish television cartoons and South Korean films, contributors explore the recurrent idea that “children are like old people,” as well as other relationships between children and elderly characters as constructed in literature and media from the mid-nineteenth century to the present. This volume deals with fiction and analyzes language as well as verbally sparse, visual productions, including children's literature, film, television, animation, and advertising.

the mom who made a flat daddy out of cardboard and sat it at the dinner table when her kids were missing their deployed military father. Every parent and kid is unique, and as we get to know our kids, we can figure out what makes them tick. Because this is an ongoing process, Weird Parenting Wins covers children of all ages, ranging in topics from The Art of Getting Your Kid to Act Like a Person (on hygiene, potty training, and manners) to The Art of Getting Your Kid to Tell You Things (because eventually, they're going to be tight-lipped). You may find that someone else's weird parenting win works for you, or you might be inspired to try something new the next time you're stuck in a parenting rut. Or maybe you'll just get a good laugh out of the mom who got her kid to try beets because...it might turn her poop pink.

where the mountain meets the moon by grace lin: Developing Fluent Readers Melanie R. Kuhn, Lorell Levy, 2015-01-06 Viewing fluency as a bridge between foundational skills and open-ended learning, this book guides teachers through effective instruction and assessment of fluent reading skills in the primary grades. Fluency's relationship to phonological awareness, phonics, and print concepts is explained, and practical methods are shared for integrating fluency instruction in a literacy curriculum grounded in the Common Core State Standards (CCSS). Classroom examples, weekly lesson plans, and extensive lists of recommended texts add to the book's utility for teachers.
