journeys the harvest birds study guide answers: Harvest the Wind Philip Warburg, 2012-04-17 Winds sweeping through the Great Plains once robbed the Farm Belt of its future, stripping away overworked topsoil and creating the dreaded Dust Bowl of the 1930s. Today, those winds are bringing new hope to the declining rural communities of the central United States. Nowhere is wind's promise more palpable than in Cloud County, Kansas, where the soaring turbines of the Meridian Way Wind Farm are boosting incomes and bringing green jobs to a community that has, for decades, watched its children drift away. In *Harvest the Wind*, Philip Warburg brings readers face-to-face with the people behind the green economy-powered resurgence in Cloud County and communities like it across the United States. This corner of Kansas is the first stop on an odyssey that introduces readers to farmers, factory workers, biologists, and high-tech entrepreneurs—all players in a transformative industry that is taking hold across America and around the globe. In this illuminating book, Warburg reveals both the remarkable growth of a breakthrough technology and the formidable challenges it faces. He visits epicenters of anti-wind opposition as well as communities that have embraced wind farms as neighbors. He guides readers through an Iowa turbine assembly plant that is struggling to compete in a global marketplace dominated by European and Chinese manufacturers. And he looks at the thousands of miles that wind-generated power will need to travel to reach American consumers. *Harvest the Wind* is an earthly antidote to loftier treatises on global warming and green energy. By showing us how practical solutions are being implemented at the local level, Warburg offers an inspirational look at how we can all pursue a saner and more sustainable energy future—while at the same time investing in the nation's infrastructure and jumpstarting its economy.

"An entertaining and illuminating love letter to the mysterious and often misunderstood creatures that come alive when we go to bed—and a call to preserve our precious, shared world."—Robin Bicknell, award-winning documentary filmmaker, Ice and Fire and Nature's Cleanup Crew When the sun sets,

things start to get interesting among wild animals. Wherever we live, whether in the city or suburbs or country, darkness conjures a hidden world of wildlife that most of us rarely glimpse. Foxes, wolves, and bears prowl while skunks, opossums, and porcupines lurk; fireflies send flashing signals to potential mates; raccoons rummage for food; owls and bats fly overhead. Wildlife biologist Sophia Kimmig is our guide to the startling behaviors of these and many more nocturnal creatures. Introducing us to night's wild inhabitants, she reveals what life for them is like in this parallel world—how it looks, feels, and smells—and the ingenious ways some creatures thrive after sunset. *Living Night* helps us appreciate how essential darkness is: not just a time but a diverse habitat all to itself—one that we still know too little about, and that we must urgently protect for the benefit of the world's flora and fauna that depend on the day-night cycle.
