russia latest economic news

Russia Latest Economic News: Navigating Challenges and Opportunities in 2024

russia latest economic news paints a complex picture of resilience and adaptation amidst a shifting global landscape. As the world continues to grapple with geopolitical tensions, sanctions, and fluctuating commodity prices, Russia's economy remains a key area of interest for investors, policymakers, and analysts alike. In this article, we'll explore the most recent developments shaping Russia's financial and economic environment, highlighting the factors influencing growth, trade, and domestic policy.

Overview of Russia's Current Economic Climate

Over the past year, Russia's economy has faced significant headwinds, largely driven by ongoing international sanctions and volatile energy markets. Despite these challenges, the country has shown surprising economic resilience, partly due to its diversification efforts and strong fiscal policies. Inflation rates have moderated compared to earlier spikes, and consumer spending is gradually stabilizing, signaling cautious optimism among households.

Impact of Sanctions on Trade and Industry

One of the most critical aspects of russia latest economic news is how sanctions imposed by Western countries continue to affect trade dynamics. Restrictions on technology imports, financial transactions, and energy exports have forced Russia to pivot toward alternative markets, particularly in Asia and the Middle East. For example, increased trade partnerships with China and India have helped offset some losses from traditional European markets.

At the same time, domestic industries are adapting by developing local manufacturing capabilities, especially in sectors like automotive, defense, and agriculture. This shift aims to reduce reliance on foreign components and enhance self-sufficiency, although challenges around technology access and investment remain.

Energy Sector Developments

The energy sector is a cornerstone of Russia's economy, and recent news highlights both opportunities and obstacles within this domain. Oil and gas exports continue to generate substantial revenue, but price fluctuations and geopolitical tensions have created uncertainty.

Shifts in Global Energy Demand

With Europe seeking to reduce dependency on Russian energy, Russia has strategically redirected much of its output toward Asia. New pipeline projects and long-term contracts with countries like China have become focal points in the energy trade narrative. Additionally, Russia is exploring investments in liquefied natural gas (LNG) infrastructure to increase flexibility in global markets.

However, the global push toward renewable energy and climate policies presents a longer-term challenge for Russia’s fossil fuel-driven economy. The government is beginning to consider diversification within the energy sector, including potential growth in nuclear energy and renewable sources.

Monetary Policy and Inflation Trends

The Central Bank of Russia has played a crucial role in stabilizing the economy amid external pressures. Recent economic reports indicate a cautious approach to interest rates, balancing inflation control with the need to support economic activity.

Inflation Control Measures

Following periods of high inflation, recent data shows a downward trend, attributed to tighter monetary policy and improved supply chains. The ruble has experienced relative stability compared to previous years, bolstered by foreign currency reserves and capital controls.

However, inflation remains a concern, especially for essential goods and services. The government has implemented targeted subsidies and price controls to ease the burden on vulnerable populations, while encouraging domestic production to reduce import dependence.

Foreign Investment and Economic Partnerships

Despite geopolitical complexities, Russia continues to seek foreign investment, focusing on strategic sectors such as technology, infrastructure, and agriculture. Efforts to attract investors include regulatory reforms and incentives aimed at improving the business climate.

Emerging Markets and Bilateral Agreements

Russia’s pivot towards emerging markets has been a significant theme in the latest economic news. Bilateral agreements with countries in Asia, Africa, and Latin America are expanding trade networks and investment flows. These partnerships often include joint ventures, technology transfers, and infrastructure projects, fostering economic cooperation beyond traditional Western alliances.

Technology and Innovation in Russia’s Economic Landscape

Innovation remains a critical driver for Russia’s economic future, especially as the country seeks to overcome technological embargoes. Recent initiatives emphasize digital transformation, artificial intelligence, and cybersecurity as priority areas.

Government Initiatives to Boost Tech Sector

The Russian government has launched several programs to support startups and tech companies, aiming to create a more self-reliant technology ecosystem. Funding for research and development has increased, alongside efforts to improve education and talent retention in STEM fields.

These moves are designed to reduce the impact of sanctions on access to Western technologies, promoting homegrown alternatives and international collaboration with non-Western partners.

Consumer Behavior and Domestic Market Trends

Understanding shifts in consumer behavior offers valuable insights into Russia’s economic dynamics. Recent trends indicate a cautious yet steady recovery in retail sales and household spending.

Changing Preferences and Market Adaptation

Russian consumers are increasingly favoring domestic products, a trend accelerated by import restrictions and patriotic buying campaigns. E-commerce continues to grow rapidly, supported by improved digital infrastructure and mobile connectivity.

Retailers and manufacturers are adapting by expanding online offerings, enhancing logistics, and tailoring products to local tastes. This evolution in the domestic market reflects broader efforts to stimulate internal demand and economic resilience.

Looking Ahead: What to Watch in Russia’s Economy

Keeping an eye on various indicators can provide a clearer picture of the trajectory of russia latest economic news. Key factors include global commodity prices, geopolitical developments, monetary policy decisions, and the success of diversification strategies.

Investors and analysts will also be watching Russia’s progress in technological innovation and foreign trade partnerships, as these areas will likely influence long-term growth. While uncertainties remain, the country’s ability to adapt and navigate external pressures will be crucial in shaping its economic future.

As the global economy continues to evolve, russia latest economic news underscores the importance of flexibility, strategic alliances, and innovation in maintaining economic stability and pursuing sustainable development.

Frequently Asked Questions

What are the latest developments in Russia's GDP growth in 2024?

Russia's GDP growth in early 2024 has shown signs of stabilization despite ongoing sanctions, with modest increases driven by energy exports and domestic consumption.

How have international sanctions impacted Russia's economy recently?

International sanctions continue to pressure Russia's economy by limiting access to technology and foreign investment, but the country has been adapting through import substitution and strengthening trade ties with non-Western partners.

What is the current state of Russia's oil and gas

exports?

Russia remains a major player in global energy markets, with oil and gas exports sustaining its revenue streams, although volumes have shifted towards Asia due to Western sanctions and reduced demand from Europe.

How is inflation trending in Russia as of 2024?

Inflation in Russia has moderated compared to the previous year, helped by tighter monetary policies and stabilization in food and fuel prices, but remains above the central bank's target.

What measures is the Russian government taking to support its economy?

The Russian government has implemented stimulus measures including increased infrastructure spending, tax incentives for key industries, and support for domestic manufacturing to counteract economic challenges.

How is the Russian ruble performing in the foreign exchange market recently?

The Russian ruble has experienced relative stability recently due to capital controls and strong energy export revenues, although it remains vulnerable to external shocks and geopolitical tensions.

What are the prospects for foreign investment in Russia amid current geopolitical tensions?

Foreign investment in Russia remains cautious and limited, with many Western investors pulling back; however, investments from countries in Asia and the Middle East have increased as Russia seeks to diversify its economic partnerships.

Russia Latest Economic News: Navigating Challenges Amid Global Uncertainty

russia latest economic news highlights a complex and evolving landscape marked by geopolitical tensions, shifting trade dynamics, and internal policy adjustments. As the world's largest country by landmass, Russia's economy continues to attract global attention due to its significant energy exports, strategic natural resources, and its position within global markets. Recent developments reflect a mix of resilience and vulnerability as Moscow grapples with sanctions, fluctuating commodity prices, and efforts to diversify its economic base.

Current Economic Indicators and Growth Trends

Despite facing extensive Western sanctions since early 2022, Russia's economy has shown unexpected signs of stabilization. According to the latest figures released by the Russian Federal State Statistics Service, the GDP growth rate for the first quarter of 2024 hovered around 0.5%, signaling a modest recovery compared to the contraction experienced during the immediate post-sanction period.

Inflation remains a critical concern, with consumer price indices rising by approximately 6.3% year-over-year—a slowdown from previous highs but still above the Central Bank of Russia's target range. This inflationary pressure largely stems from supply chain disruptions and increased costs of imported goods due to currency volatility and trade restrictions.

Unemployment rates have stabilized around 4.7%, a figure comparable to pre-sanction levels, suggesting that the labor market has adapted to new economic realities. However, wage growth remains subdued, limiting consumer spending power and potentially restricting broader economic expansion.

Energy Sector: The Lifeline Amid Sanctions

Energy exports, particularly oil and natural gas, continue to be the backbone of Russia's economy. Despite sanctions targeting energy sales, Russia has successfully redirected a significant portion of its exports to Asian markets, notably China and India. Recent data indicate that hydrocarbon exports account for nearly 45% of federal budget revenues, underscoring their critical role.

However, the transition to alternative markets has not been seamless. Lower pricing agreements and increased transportation costs via new routes have somewhat diminished profit margins. Additionally, European buyers, historically Russia's largest consumers, have sharply reduced imports, accelerating the pivot to Asia but also highlighting the risks of overdependence on limited markets.

The gas sector, including pipeline projects like Nord Stream 2, remains politically contentious and economically significant. While some projects face delays or cancellations, Russia is expanding liquefied natural gas (LNG) capacity to maintain its global energy influence.

Impact of Sanctions and Countermeasures

The comprehensive sanctions imposed by the United States, the European Union, and other allies have targeted Russian financial institutions, technology imports, and key industries. These measures aim to curtail Moscow’s ability to finance its operations and access Western technology.

In response, Russia has accelerated import substitution strategies, promoting domestic production across sectors such as agriculture, manufacturing, and technology. The government has allocated substantial funds towards supporting local enterprises and incentivizing innovation. For example, the agricultural sector has experienced growth, with Russia becoming a leading exporter of wheat and other grains despite global logistical challenges.

Moreover, Russia has strengthened financial ties with non-Western partners, increasing bilateral trade with countries in Asia, the Middle East, and Latin America. The shift towards conducting transactions in rubles and other currencies is part of a broader effort to reduce reliance on the US dollar and insulate the economy from external shocks.

Structural Challenges and Economic Diversification Efforts

While energy exports remain vital, Russia faces long-standing issues related to economic diversification and modernization. Overdependence on commodities exposes the country to price volatility and geopolitical risks. Recent government initiatives aim to stimulate sectors such as information technology, manufacturing, and green energy.

Technology and Innovation Landscape

Russia’s technology sector has experienced both setbacks and opportunities amid international isolation. Restrictions on importing critical semiconductors and software have challenged domestic firms, but have also spurred innovation in areas such as cybersecurity and software development tailored to the Russian market.

Investment in digital infrastructure and education continues, with the government promoting “digital sovereignty” to reduce dependence on foreign technology. However, attracting foreign investment remains difficult due to geopolitical risks and an uncertain regulatory environment.

Green Energy and Environmental Policies

In alignment with global trends, Russia has announced plans to increase its renewable energy capacity, although fossil fuels will likely dominate the energy mix for decades. The government aims to attract investment in wind, solar, and hydroelectric power, particularly in regions like Siberia and the Far East.

Environmental sustainability efforts also include modernizing industrial processes and improving resource efficiency, but challenges remain in balancing economic growth with ecological concerns.

Foreign Trade and Investment Dynamics

Russia’s foreign trade patterns are undergoing substantial transformation, driven largely by sanctions and shifting alliances. The export structure is adapting, with increased emphasis on non-Western markets and strategic sectors.

Trade Partners and Export Composition

China is now Russia’s largest trading partner, accounting for nearly 20% of total trade turnover. The energy sector dominates exports to China, but there is growing cooperation in areas like agriculture, defense, and technology. India and countries in the Middle East are also expanding trade ties, providing alternative markets for Russian goods.

Conversely, trade with the European Union has contracted sharply, with energy imports from Russia falling by over 60% compared to pre-2022 levels. This decline has led to short-term disruptions but also accelerated Russia’s efforts to build self-reliance and diversify export destinations.

Foreign Direct Investment (FDI)

Foreign direct investment into Russia has declined due to political risks and economic uncertainty. Many Western companies have withdrawn or reduced operations, while investors from Asia and the Middle East have shown cautious interest, particularly in energy and infrastructure projects.

The government is seeking to improve the investment climate by simplifying regulations and offering incentives for strategic industries, but challenges related to transparency, governance, and legal protections persist.

Monetary Policy and Financial Sector Developments

The Central Bank of Russia has maintained a cautious stance to balance inflation control and economic support. Interest rates have been adjusted gradually, with the current benchmark rate at 7.5%, reflecting efforts to stimulate growth without fueling excessive inflation.

The ruble has experienced volatility but remains relatively stable due to capital controls and interventions. Banking sector resilience has improved, with increased capitalization and liquidity, although exposure to international financial markets remains limited.

Digital Ruble and Financial Innovation

One of the notable developments is the ongoing pilot of the digital ruble, Russia's central bank digital currency (CBDC). This initiative aims to modernize payment systems, enhance transaction efficiency, and reduce dependence on foreign payment infrastructures.

The digital ruble could also facilitate cross-border transactions with trusted partners, aligning with Russia's broader strategy to circumvent sanctions and promote monetary sovereignty.

Navigating a challenging geopolitical environment, Russia's economy exhibits a cautious blend of adaptation and resilience. The latest economic news reveals efforts to mitigate sanction impacts, pivot trade relationships, and invest in strategic sectors. While structural vulnerabilities persist, particularly in diversification and foreign investment, Russia continues to leverage its resource wealth and geopolitical positioning to maintain stability amid global uncertainty.

Russia Latest Economic News

russia latest economic news: Der Angriff Serhii Plokhy, 2023-05-04 Welche Folgen hat Russlands Angriff in den kommenden Jahrzehnten für den Westen und die Welt? Dieses hochaktuelle, dringende Buch gibt Antworten auf entscheidende Fragen unserer Zeit. In seinem neuen Buch gibt der renommierte Historiker und Ost-Europa-Experte Serhii Plokhy Antworten darauf, wie Russlands Krieg die Weltordnung der nächsten Jahrzehnte verändern wird. Er erzählt von einem ukrainischen Volk, das als Frontstaat im jetzt anbrechenden neuen Kalten Krieg endlich seine Identität gefunden hat. Und er skizziert eine globale Außenpolitik, die sich wieder weg von ökonomischer Kooperation, hin zu Dominanz, Vasallenstaaten und militärischer Stärke entwickelt – mit gravierenden Folgen für uns alle. Nur wenn der Westen sich dieser Realität stellt, wird er in Zukunft seine Freiheit behaupten können.

russia latest economic news: Economic Transition in Russia and the New States of Eurasia Anjum Siddiqui, 2007 Examines the economies and geo-political developments of India, Pakistan, Afghanistan, Nepal, Bangladesh, Sri Lanka, and Bhutan. This work focuses on three core areas of importance: trade and development in the post-WTO era of globalization; macroeconomic adjustment and economic growth; and more.

russia latest economic news: Economic Transition in Russia and the New States of Eurasia Bartłomiej Kamiński, 1996 This volume covers the economic progress made by the new states of the former Soviet Union in the transition from command to market economies. Topics discussed include: political and economic adjustments; the domestic dimension; macropolicies; restructuring; and regional and world integration.

russia latest economic news: The Russo-Ukrainian War Serhii Plokhy, 2023-05-09 “Compelling…. [E]rudite, objective and immensely readable.” —Ben Hall, Financial Times An authoritative history of Europe’s largest military conflict since World War II, from the New York Times best-selling author of The Gates of Europe. Despite repeated warnings from the White House, Russia’s invasion of Ukraine in February 2022 shocked the world. Why did Putin start the war—and why has it unfolded in previously unimaginable ways? Ukrainians have resisted a superior military; the West has united, while Russia grows increasingly isolated. Serhii Plokhy, a leading historian of Ukraine and the Cold War, offers a definitive account of this conflict, its origins, course, and the already apparent and possible future consequences. Though the current war began eight years before the all-out assault—on February 27, 2014, when Russian armed forces seized the building of the Crimean parliament—the roots of this conflict can be traced back even earlier, to post-Soviet tensions and imperial collapse in the nineteenth and twentieth centuries. Providing a broad historical context and an examination of Ukraine and Russia’s ideas and cultures, as well as domestic and international politics, Plokhy reveals that while this new Cold War was not inevitable, it was predictable. Ukraine, Plokhy argues, has remained central to Russia’s idea of itself even as Ukrainians have followed a radically different path. In a new international environment defined by the proliferation of nuclear weapons, the disintegration of the post–Cold War international order, and a resurgence of populist nationalism, Ukraine is now more than ever the most volatile fault line between authoritarianism and democratic Europe.

russia latest economic news: Power, Energy, and the New Russian Imperialism Anita Orban, 2008-09-30 Russia is the world's foremost energy superpower, rivaling Saudi Arabia as the world's largest oil producer and accounting for a quarter of the world's exports of natural gas. Russia's energy reserves account for half of the world's probable oil reserves and a third of the world's proven natural gas reserves. Whereas military might and nuclear weapons formed the core of Soviet cold war power, since 1991 the Russian state has viewed its monopolistic control of Russia's energy resources as the core of its power now and for the future. Since 2005, the international news has been filled with Russia's repeated demonstrations of its readiness to use price, transit fees, and supply of gas and oil exports as punitive policy instruments against recalcitrant states that were formerly part of the Soviet Union, striking in turn the Ukraine, Georgia, Azerbaijan, Armenia, Belarus, and Lithuania. Orban reveals for the first time in Power, Energy, and the New Russian Imperialism Russia's readiness to wield the same energy weapon against her neighbors on the west, all of them former Soviet satellite states but now EU and NATO member nations: the three Baltic nations and the five East European nations of Poland, Slovakia, Hungary, the Czech Republic, and Slovenia. Orban shows how the Kremlin since 1991 has systematically used Russian energy companies as players in a concerted neo-mercantilist, energy-based foreign policy designed to further Russia's neo-imperial ambitions among America's key allies in Central East Europe. Her unprecedented analysis is key to predicting Russia's strategic response to American negotiations with Poland and the Czech Republic to host the US missile shield. She also reveals the economic and diplomatic modus operandi by which Russia will increasingly apply its energy clout to shape and coerce the foreign policies of the West European members of the EU, as Russia's contribution to EU gas consumption increases from a quarter today to three-quarters by 2020. Orban proves that Russia's neo-mercantilist energy strategy in East Europe is not at all dependent on the person of Putin, but began under Yeltsin and continues under Medvedev, the former chairman of Gazprom.

russia latest economic news: Vietnam Economic News , 2007-08-28

russia latest economic news: Russian Economic Reform Jim Leitzel, 1995 Focuses on the actual pre-reform conditions including the widerspread private, informal economic activity.

russia latest economic news: Publikumsfondsgesellschaften in der Russischen Föderation , 2013-12-18 Investmentfonds als Kapitalanlage sind entstanden, um einer breiten Bevölkerungsschicht die Möglichkeit zu geben, sich am Kapitalmarkt auch mit kleineren Beträgen zu beteiligen. Historisch gesehen haben sich Investmentfonds überwiegend dort gut entwickelt, wo ein Überschuß an Kapitalangebot auf eine sinkende Kapitalnachfrage gestoßen ist. In Zeiten eines knappen Kapitalangebots erschienen Fonds dementsprechend für die Anleger unattraktiv, so daß zum Beispiel auch in Deutschland dem Investmentsparen in den 20er Jahren wenig Erfolg beschieden war. In Rußland liegt demgegenüber eine völlig andere Situation vor. Einer hohen Kapital nachfrage steht zwar ein ansehnliches Kapitalangebot gegenüber, aus der Sicht der Anleger fehlt es den Kapitalnachfragern aber an der notwendigen Bonität. Trotz der Liberalisierung des russischen Kapitalmarkts hat die Bevölkerung noch kein Vertrauen in dessen Funktionsfahigkeit und bevorzugt die private Kapitalansammlung in Fluchtwährungen in Form von sogenanntem Matratzengeld. Herr Mellinghoff nahm diese Situation zum Anlaß, die institutionellen Rahmenbedingungen für die Entwicklung des Investmentsparens in Rußland zu untersuchen und die Frage zu beantworten, inwieweit Rußland ein Markt für internationale Fondsgesellschaften sein kann.

russia latest economic news: Die Erdgasexporte Turkmenistans Heinrich Schulz, 2017-07-25 Heinrich Schulz geht der Frage nach, warum es trotz mehrerer Anläufe noch nicht gelungen ist, turkmenisches Erdgas unter Umgehung des russischen Pipelinesystems in die Türkei sowie nach Europa zu exportieren. Schließlich verfügt Turkmenistan über umfangreiche Gasreserven und ist bestrebt, seine Erdgasexporte zu diversifizieren. Der Autor untersucht die Ursachen für das Scheitern der verschiedenen Pipelineprojekte und zeigt, dass geo- und energiepolitische Interessen sowie Veränderungen auf dem internationalen Gasmarkt wesentliche Gründe für deren Misserfolg sind.

russia latest economic news: Russian Economic Reform James Leitzel, 2005-06-22 Transitions from socialism to capitalism are complex, both in theory and practice. Russian Economic Reform enables the reader to come to a much better understanding of these momentous changes, by providing a clear and accessible account of the major features of transition. It argues that attempts to portray the reform process is a disaster are misconceived, because they fail to take account of just how badly the pre-reform economy was doing. Many of the problems that are emerging now have their antecedents in the earlier economic system.

russia latest economic news: *Russia's Changing Economic and Political Regimes* Andrey Makarychev, Andre Mommen, 2013-07-18 The book reveals the interconnection between social, cultural and political protest movements and social and economic changes in a post-communist country like Russia still dominated by bureaucratic rulers and oligarchs controlling all basic industries and mining activities. Those interests are also dominating Russia’s foreign policy and explain why Russia did not succeed in becoming an integral part of Europe. The latter is, at least, wished by many Russian citizens.

russia latest economic news: *Failure. Russia Under Putin* Harley D. Balzer, Steven A. Fisher, 2025-07-10 Examines the significant failures Russia has faced under Vladimir Putin's leadership and presents an important counterpoint to a broad range of studies emphasizing Russia's resurrection, status as a persistent power, or successful military reform. Despite Putin's claims of restoring Russia's rightful place in the world, reviving the economic and industrial capacity destroyed in the 1990s, and improving living standards, data show that the gains from the oil price bonanza of 2000-2008 have long since vanished. The success Putin has achieved in centralizing power and repressing opposition now prevents any effective changes to address Russia's long-term decline. Failures include the inability to diversify the economy, reduce corruption, reverse demographic and educational decline, alleviate poverty, or address social inequalities. This edited volume examines how Putin's policy choices have led to Russia's inexorable decline on the global stage. Depicting Russia's inability under Vladimir Putin's rule to improve critical spheres of its national life, aggravated by military belligerence and adventurism abroad, chapters detail how Putin's policies have severely limited Russia's development and institutional stability, leaving the country without a clear leadership transition mechanism or capacity to abandon flawed policies.

russia latest economic news: *Geopolitics, Geoeconomics and Borderlands* Antonia Colibășanu, 2023-07-25 This book discusses the emerging threats to European stability in different borderland regions, from the Greater Middle East to the Eastern Mediterranean, the Balkans and the Black Sea. It highlights the specific geopolitical risks that could, left unchecked, have global repercussions. The book shows how recent events have exasperated underlying problems that have been slowly destabilizing each of these regions for years. It also looks at the geopolitical constraints and objectives of the countries within these regions to build a basis for understanding their current and future security challenges. While doing so, the book discusses the European borderlands in a non-traditional way, proposing a specific framework to study them, going beyond historical analysis and employing a heuristic process and in-depth socio-economic analysis to understand regional power relations and trends. It develops the key concepts of core borderland and geopolitical node to understand the future challenges that Europe in particular and Eurasia, in general, will face, discussing specific features shaping current affairs and identifying the main drivers - countries and specific regional elements - for the future stability of the borderlands. This book will appeal to students and scholars of international relations, as well as policy-makers, practitioners, and international organizations interested in a better understanding of current and future challenges at Europe's borderlands and the security risks the European continent faces.

russia latest economic news: *Digital Transformation of the Economy: Challenges, Trends and New Opportunities* Svetlana Ashmarina, Anabela Mesquita, Marek Vochozka, 2019-02-05 This book gathers the best contributions from the conference “Digital Transformation of the Economy: Challenges, Trends and New Opportunities”, which took place in Samara, Russian Federation, on May 29–31, 2018. Organized by Samara State University of Economics (Samara), Russia, the conference was devoted to issues of the digital economy.Presenting international research on the impact of digitalization on economic development, it includes topics such as the transformation of the institutional environment under the influence of informatization, the comparative analysis of the digitalization development in different countries, and modeling the dependence of the rate of change in the economy on the level of the digitalization penetration into various spheres of human activity. It also covers business-process transformation in the context of digitalization and changes in the structure of employment and personnel training for the digital economy. Lastly, it addresses the issue of ensuring information security and dealing with information risks for both individual enterprises and national economies as a whole. The book appeals to both students and researchers whose interests include the development of the digital economy, as well as to managers and professionals who integrate digital solutions into real-world business practice.

russia latest economic news: The Russia-Ukraine Conflict and Development in Africa David Mhlanga, Emmanuel Ndhlovu, 2024-09-02 This edited volume provides a comprehensive analysis of the intricate dynamics of the Russia-Ukraine conflict, particularly within the context of sustainable development in Africa. The book explores the multifaceted consequences of the war, drawing attention to its socioeconomic, environmental, and political implications. It also emphasizes the significance of sustainable development on a global scale, positioning itself at the intersection of conflict studies and sustainable development literature. Chapters discuss the international response to the conflict, including sanctions on Russia and disruptions in global supply chains, which has had significant implications for countries in Africa that rely on Russia and Ukraine for essential commodities. The history and root causes of the conflict are analyzed, highlighting the contrasting narratives – the pro-Russian perspective and the pro-Western viewpoint. Underscoring the impact of the Russia-Ukraine conflict on global peace, sustainable development, and the achievement of Sustainable Development Goals (SDGs) by the 2030 deadline, this volume will be of interest to researchers and students focusing on development, food systems, peace and conflict, security studies, international relations, and the SDGs.

russia latest economic news: Guide to Business Info on Russia, the NIS, and the Baltic States Tania Konn, 2014-02-04 This guide is an introduction to English-language sources, in electronic and conventional print forms, dealing with Russia/NIS/Baltic states business issues. It provides evaluative descriptions and costs of all listed sources, and concentrates on recent sources. Sources in respect of some of these countries can be very difficult to locate, and the author provides guidance on how to go about finding them. Contents: Under each country, information sources are grouped in broad categories: Overview (sources designed to answer general, exploratory, country and regional questions; eg. population, politics, how to do business, etc); Current developments (eg. recent changes in tax and other laws, trends in foreign direct investment, latest project tenders); Companies and contacts; Industries and services; Legislation; Organisations (a listing of agencies able to provide assistance, information and business data); Index. The countries covered are: Armenia; Azerbaijan; Belarus; Central Asia and Transcaucasia; Estonia; Georgia; Kazakhstan; Kyrgyztan; Latvia; Lithuania; Moldova; Russian Federation; Ukraine; Uzbekistan.

russia latest economic news: Guide to Business Information on Russia, the NIS and the Baltic States Tania Konn, 2003-09-02 This guide is an introduction to English language sources, in electronic and print form, dealing with business issues in Russia, the NIS and the Baltic States. It gives evaluative descriptions and costs of all listed sources, concentrating on recent sources. Sources of information on some of these countries can be difficult to locate, and the author gives guidance on how to go about finding them. Contents: Under each country, information sources are grouped in broad categories: Overview (sources designed to answer general, exploratory, country and regional questions, e.g. population, politics, how to do business etc); Current developments (e.g. recent changes in tax and other laws, trends in foreign direct investment, latest project tenders); Companies and contacts; Industries and services; Legislation; Organisations (a listing of agencies and bodies able to provide assistance, information and data to business people).

russia latest economic news: World Databases in Geography and Geology Chris Armstrong, 2020-01-20 No detailed description available for World Databases in Geography and Geology.

russia latest economic news: *The Political Economy of Corporate Raiding in Russia* Ararat Osipian, 2018-03-28 Corporate raiding – the shocking phenomenon whereby criminals, business rivals and even state bureaucrats visit business headquarters and force owners or staff to transfer business assets, land or property – is an increasing problem in Russia. This book, based on extensive original research, provides a comprehensive overview of this activity. It describes the nature of corporate raiding, provides numerous case studies and discusses the role of the state and government officials. Overall the book argues that the prevailing climate of business and government in Russia leads to a situation where control is closely linked to corruption and coercion.

russia latest economic news: Economic Transition in Eastern Europe and Russia: Realities of Reform , An evaluation of the efficacy of different forms of liberalization since the fall of communism in Eastern Europe, in the form of 13 essays on economic and political reforms. Following an extensive introductory essay (Economic Reform: Appropriate Steps and Actual Policies), the remaining essays are organized in three parts: fundamental components of economic reform; specific problems in reform; and comparisons and evaluations. Annotation copyright by Book News, Inc., Portland, OR
