The advice on how to teach the various subjects of reading, writing, math, social studies and computer skills is invaluable. The book is well organized, easy to understand and is full of specific routines for productive and rewarding homeschooling for teacher and student. Debbie taught my daughter, Vinci, in fourth grade and it was a wonderful year for her. She gained the necessary confidence to succeed academically in Debbie's class that propelled her lively mind and scholastic achievements to this day. -- Dawn Daro, mother of Vinci Daro, B.A. and secondary teaching credential UC Berkeley, taught Junior High Richmond Unified School District _____ For parents new to teaching, as for anybody else, simple tools can help a lot. If so, it may be time to take charge of your child's education—by doing it yourself. The Well-Trained Mind will instruct you, step by step, on how to give your child an academically rigorous, comprehensive education from preschool through high school—one that will train him or her to read, to think, to understand, to be well-rounded and curious about learning. Veteran home educators Susan Wise Bauer and Jessie Wise outline the classical pattern of education called the trivium, which organizes learning around the maturing capacity of the child's mind and comprises three stages: the elementary school "grammar stage," when the building blocks of information are absorbed through memorization and rules; the middle school "logic stage," in which the student begins to think more analytically; and the high-school "rhetoric stage," where the student learns to write and speak with force and originality. Using this theory as your model, you'll be able to instruct your child—whether full-time or as a supplement to classroom education—in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. Thousands of parents and teachers have already used the detailed book lists and methods described in The Well-Trained Mind to create a truly superior education for the children in their care. This extensively revised fourth edition contains completely updated curricula and book lists, links to an entirely new set of online resources, new material on teaching children with learning challenges, cutting-edge math and sciences recommendations, answers to common questions about home education, and advice on practical matters such as standardized testing, working with your local school board, designing a high-school program, preparing transcripts, and applying to colleges. You do have control over what and how your child learns. The Well-Trained Mind will give you the tools you'll need to teach your

child with confidence and success.
