julie and julia my year of cooking dangerously: *Transferred Illusions* Marilyn Deegan, Kathryn Sutherland, 2016-02-24 This is a study of the forms and institutions of print - newspapers, books, scholarly editions, publishing, libraries - as they relate to and are changed by emergent digital forms and institutions. In the early 1990s hypertext was briefly hailed as a liberating writing tool for non-linear creation. Fast forward no more than a decade, and we are reading old books from screens. It is, however, the newspaper, for around two hundred years print's most powerful mass vehicle, whose economy persuasively shapes its electronic remediation through huge digitization initiatives, dominated by a handful of centralizing service providers, funded and wrapped round by online advertising. The error is to assume a culture of total replacement. The Internet is just another information space, sharing characteristics that have always defined such spaces - wonderfully effective and unstable, loaded with valuable resources and misinformation; that is, both good and bad. This is why it is important that writers, critics, publishers and librarians - in modern parlance,

the knowledge providers - be critically engaged in shaping and regulating cyberspace, and not merely the passive instruments or unreflecting users of the digital tools in our hands.

julie and julia my year of cooking dangerously: Detoxing Masculinity in Anglophone Literature and Culture Sara Martín, M. Isabel Santaulària, 2023-03-07 This edited volume rethinks Masculinity Studies by breaking away from the notion of the perpetual crisis of masculinity. It argues that not enough has been done to distinguish patriarchy from masculinity and proposes to detox masculinity by offering a collection of positive representations of men in fictional and non-fictional texts. The editors show how ideas of hegemonic and toxic masculinity have been too fixed on the exploration of dominance and subservience, and too little on the men (and the male characters in fiction) who behave following other ethical, personal and socially accepted patterns. Bringing together research from different periods and genres, this collection provides broad, multidisciplinary insights into alternative representations of masculinity.

julie and julia my year of cooking dangerously: The Literature of Food Nicola Humble, 2020-02-06 Why are so many literary texts preoccupied with food? The Literature of Food explores this question by looking at the continually shifting relationship between two sorts of foods: the real and the imagined. Focusing particularly on Britain and North America from the early 19th century to the present, it covers a wide range of issues including the politics of food, food as performance, and its intersections with gender, class, fear and disgust. Combining the insights of food studies and literary analysis, Nicola Humble considers the multifarious ways in which food both works and plays within texts, and the variety of functions-ideological, mimetic, symbolic, structural, affective-which it serves. Carefully designed and structured for use on the growing number of literature of food courses, it examines the food of modernism, post-modernism, the realist novel and children's literature, and asks what happens when we treat cook books as literary texts. From food memoirs to the changing role of the servant, experimental cook books to the cannibalistic fears in infant picture books, The Literature of Food demonstrates that food is always richer and stranger than we think.
