have an increasing role in heritage and tourism policies, and how this recognition of music has consequences on artistic practices and urban imaginaries. This is a must-read for anyone interested in the relationship between space and music.

Whereas in the two mentioned monographs, the emphasis has been on scholars and social and natural scientists; and men and women in medicine, applied sciences and engineering, respectively, the present compendium deals with notable Americans of Czechoslovak ancestry in arts and letters, and in education. With respect to women, although most professional fields were closed to them through much of the nineteenth century, the area of arts and letters was opened to them, as noted earlier and as this compendium authenticates.
