

the reflective practitioner how professionals think in action

The Reflective Practitioner: How Professionals Think in Action

the reflective practitioner how professionals think in action is a concept that has transformed the way we understand expertise and decision-making in various fields. Instead of viewing professional knowledge as static or purely theoretical, this idea highlights the dynamic, thoughtful process that occurs when professionals engage with real-world problems. Whether it's a teacher adjusting their lesson on the fly or a doctor diagnosing a complex case, the reflective practitioner embodies how professionals continuously think, learn, and adapt through action.

Understanding this approach opens the door to deeper insights into professional growth, problem-solving, and effective practice in any discipline.

What Does It Mean to Be a Reflective Practitioner?

At its core, being a reflective practitioner means engaging in a cycle of reflection before, during, and after an activity. This is not just about thinking but about thinking critically and intentionally to improve one's practice. The term was popularized by Donald Schön in his groundbreaking work on professional knowledge, where he challenged the traditional ideas of technical rationality that treated expertise as fixed and fully codified.

Reflection-in-Action vs. Reflection-on-Action

Schön identified two key modes of reflection that define how professionals think in action:

- **Reflection-in-action** occurs in the midst of practice. It's the ability to think on your feet, to recognize when something isn't working as expected, and to adjust your approach immediately. For instance, a social worker might notice a client's changing behavior during a session and shift their strategy accordingly.
- **Reflection-on-action** happens after the event. It's a retrospective process where professionals analyze what happened, why certain decisions were made, and how outcomes could be improved next time. This kind of reflection is crucial for learning and professional development.

Together, these reflective processes form the backbone of how professionals evolve their expertise over time.

The Role of Experience and Intuition in Reflective

Practice

One of the most fascinating aspects of the reflective practitioner model is how it integrates experience and intuition with formal knowledge. Unlike purely theoretical learning, professional competence often depends on tacit knowledge—things we know but find hard to articulate.

Learning From Experience

Experience plays a vital role because it provides a context for reflection. When professionals encounter diverse situations, they build a reservoir of examples and lessons that inform future decisions. This experiential learning helps in recognizing patterns and anticipating challenges before they arise.

Intuition as a Product of Reflection

Intuition is sometimes misunderstood as a mysterious or purely instinctual reaction. However, in the reflective practitioner framework, intuition emerges from a deep well of experience combined with continuous reflection. A seasoned nurse, for example, might “just know” when a patient’s condition is deteriorating, not because of guesswork, but because of subtle cues they’ve learned to detect over years of practice.

How Professionals Think in Action: Real-World Examples

Understanding the reflective practitioner is easier when we see it in action across different professions. Let’s explore a few examples that illustrate how reflection shapes professional thinking:

Teachers Adapting Lessons Mid-Class

Effective educators rarely stick rigidly to lesson plans. When a teacher notices students struggling with a concept, they might pause and change their approach, using different examples or activities. This ability to think critically and adapt during teaching sessions embodies reflection-in-action.

Healthcare Professionals Diagnosing and Treating Patients

Doctors, nurses, and therapists often face complex cases where textbook solutions don’t fit perfectly. They rely on their reflective skills to interpret symptoms, consider patient histories, and adjust treatments. Post-consultation, they reflect on what went well and what could have been approached differently, refining their clinical judgment.

Designers Solving Creative Challenges

Design professionals engage in iterative processes, reflecting constantly on prototypes and feedback. They don't wait until the project's end to evaluate their work; instead, they make adjustments throughout, driven by reflection-in-action.

Developing Reflective Practice Skills

While some degree of reflection comes naturally, becoming a skilled reflective practitioner requires conscious effort and practice. Here are some strategies professionals can use to cultivate this essential skill:

Keep a Reflective Journal

Writing about daily experiences, challenges, successes, and uncertainties helps clarify thoughts and promotes deeper understanding. It can be a private space to explore what worked, what didn't, and why.

Seek Feedback and Peer Discussion

Engaging with colleagues to discuss experiences and perspectives encourages new insights and challenges assumptions. Collaborative reflection often sparks innovative solutions and reinforces learning.

Ask Reflective Questions

During or after activities, professionals can ask themselves questions such as:

- What was I trying to achieve?
- What worked well and why?
- What surprised me?
- How could I approach this differently next time?

These questions promote a habit of thoughtful analysis rather than reactive behavior.

Practice Mindfulness and Presence

Being fully present during work enables better observation and awareness of subtle cues. Mindfulness enhances the ability to engage in reflection-in-action by tuning into what's happening in real time.

Why Reflective Practice Matters in Today's World

In an age where the pace of change is rapid and complexity is ever-increasing, the reflective practitioner model offers a pathway to adaptability and continuous improvement. Professionals can no longer rely solely on rote knowledge or standardized procedures; they must think critically and adapt dynamically.

This approach leads to higher quality outcomes, greater job satisfaction, and more resilient organizations. It also fosters a culture of lifelong learning, where professionals constantly evolve rather than becoming stagnant.

Enhancing Problem-Solving and Innovation

Reflection enables practitioners to question assumptions, explore alternatives, and experiment with new methods. This mindset is crucial for innovation, whether in technology, education, healthcare, or any other field.

Promoting Ethical and Responsible Practice

By reflecting on the impact of their decisions, professionals develop a greater sense of responsibility and ethical awareness. This is particularly important in disciplines where actions have significant consequences on people's lives.

Integrating Reflective Practice Into Professional Development

Organizations and educational institutions are increasingly recognizing the value of reflective practice and incorporating it into training programs. Methods include:

- Structured reflection sessions after projects or cases
- Mentorship programs focusing on reflective dialogue
- Simulation exercises that encourage real-time reflection
- Encouraging self-assessment and personal development plans

Embedding these practices helps build a workforce capable of thoughtful, adaptive expertise.

The reflective practitioner how professionals think in action is more than a theory; it's a living process that shapes how we grow, solve problems, and navigate complexity in our careers. By embracing reflection-in-action and reflection-on-action, professionals unlock deeper levels of understanding and mastery that go beyond technical knowledge, making their work more effective, meaningful, and responsive to the challenges of today's world.

Frequently Asked Questions

What is the core concept of 'The Reflective Practitioner' by Donald Schön?

'The Reflective Practitioner' emphasizes the importance of professionals reflecting on their experiences and actions in real-time to improve their practice and solve complex problems effectively.

How does 'thinking in action' differ from traditional problem-solving approaches?

'Thinking in action' involves professionals reflecting on and adapting their strategies during the actual process of work, rather than relying solely on pre-planned solutions or retrospective analysis.

Why is reflection considered crucial for professional development according to Schön?

Reflection allows professionals to learn from their experiences, adapt to unique situations, and develop practical knowledge that goes beyond theoretical understanding.

What role does tacit knowledge play in the reflective practice model?

Tacit knowledge, or the unspoken, intuitive know-how, is central in reflective practice as professionals often draw on this implicit understanding when thinking in action.

How can professionals cultivate reflective thinking in their daily work?

Professionals can cultivate reflective thinking by regularly questioning their assumptions, seeking feedback, analyzing outcomes of their actions, and engaging in deliberate practice.

What are some challenges professionals face when trying to

be reflective practitioners?

Challenges include time constraints, organizational cultures that do not support reflection, difficulty in recognizing tacit knowledge, and discomfort with questioning one's own practices.

How does 'reflection-in-action' differ from 'reflection-on-action'?

'Reflection-in-action' happens during the activity, allowing immediate adjustments, whereas 'reflection-on-action' occurs after the event, enabling learning and future improvement.

In what professions is the concept of the reflective practitioner particularly relevant?

The concept is relevant in professions requiring complex decision-making and adaptability, such as education, healthcare, architecture, social work, and management.

How can organizations support reflective practice among their professionals?

Organizations can encourage reflective practice by fostering a culture of continuous learning, providing time and resources for reflection, and promoting open communication and feedback.

What impact has 'The Reflective Practitioner' had on professional education and training?

The book has influenced educational approaches by promoting experiential learning, critical thinking, and the integration of theory with practice to better prepare professionals for real-world challenges.

Additional Resources

The Reflective Practitioner: How Professionals Think in Action

the reflective practitioner how professionals think in action is a concept that has reshaped the understanding of professional expertise and decision-making. Originating from the seminal work of Donald Schön in the 1980s, this idea challenges traditional views that expertise resides solely in technical knowledge or routine procedures. Instead, it highlights how professionals engage in a continuous process of reflection while actively working, navigating complex and often unpredictable situations. This approach has profound implications across numerous fields, from education and healthcare to engineering and management, emphasizing the dynamic nature of professional thinking.

Understanding the Core Concept of the Reflective

Practitioner

At its essence, the reflective practitioner is someone who thinks critically about their actions as they perform them, learning and adapting in real time. This contrasts with the conventional model where professionals apply fixed bodies of knowledge to predefined problems. Schön's analysis suggests that in many professional contexts, problems are "messy" — they lack clear-cut solutions, requiring intuition, judgment, and improvisation.

The phrase "how professionals think in action" refers to this ongoing cognitive process. It involves a dialogue between the practitioner and the situation, where reflection is not a separate, post-action activity but an integral part of the moment-to-moment work. For example, a teacher might adjust a lesson based on student responses, or a surgeon might alter a procedure based on unexpected findings during an operation.

The Role of Reflection-in-Action vs. Reflection-on-Action

Schön distinguishes between two types of reflection that underpin professional thought:

- **Reflection-in-action:** This occurs during the activity itself. The practitioner monitors and modifies their approach as new information or challenges arise.
- **Reflection-on-action:** This takes place after the event, where the professional reviews and analyzes their performance to improve future practice.

Both forms are critical, but reflection-in-action is particularly noteworthy because it reveals how professionals think on their feet, often without explicit awareness. This spontaneous problem-solving is a hallmark of expertise and differentiates experienced practitioners from novices.

How the Reflective Practitioner Model Applies Across Professions

The reflective practitioner framework has been influential in reframing professional education and ongoing development. It encourages cultivating habits of critical thinking and adaptability rather than rote memorization or rigid adherence to protocols.

Education and Teaching

In education, teachers frequently face unpredictable classroom dynamics. The reflective practitioner model encourages educators to be responsive, adjusting teaching methods based on student engagement and understanding. Research shows that reflective teaching practices can improve student outcomes by fostering more personalized learning experiences. Moreover, teacher training

programs have increasingly integrated reflective exercises to build this skill set.

Healthcare and Clinical Practice

Healthcare professionals operate in high-stakes environments where conditions can rapidly change. Reflection-in-action allows clinicians to make swift judgments when unexpected complications occur. For instance, nurses and doctors must interpret patient symptoms that do not fit textbook cases and modify treatments accordingly. Studies highlight that reflective practice enhances clinical reasoning and patient safety by promoting vigilance and continuous learning.

Engineering and Design

Engineers and designers often confront complex technical challenges with incomplete data. The reflective practitioner approach supports iterative problem-solving and innovation by encouraging professionals to test ideas, assess outcomes, and revise solutions on the fly. This mindset aligns with agile methodologies widely adopted in technology and product development sectors, where flexibility and learning through action are vital.

Features and Benefits of Thinking in Action

Adopting a reflective practitioner stance offers several advantages:

1. **Enhanced Problem-Solving:** Professionals can navigate ambiguity more effectively by integrating reflection into their decision-making processes.
2. **Continuous Learning:** Real-time reflection fosters a culture of ongoing improvement, avoiding stagnation in practice.
3. **Adaptability:** Being able to adjust strategies quickly is essential in dynamic work environments.
4. **Improved Confidence and Autonomy:** Reflective practitioners develop deeper trust in their judgment, enabling independent and creative action.

However, there are challenges associated with this approach. Reflection-in-action requires mental agility and a level of self-awareness that may not come naturally to all practitioners. Additionally, high-pressure settings may limit opportunities for thoughtful reflection, potentially leading to reliance on habitual responses rather than adaptive thinking.

Integrating Reflective Practice Into Professional Development

Organizations and educators aiming to cultivate reflective practitioners often employ various strategies:

- **Structured Reflection Tools:** Journals, portfolios, and guided questioning encourage systematic review of experiences.
- **Mentorship and Peer Collaboration:** Discussing challenges with colleagues enhances perspective-taking and critical analysis.
- **Simulations and Role-Playing:** These techniques create safe spaces for practicing reflection-in-action under controlled conditions.
- **Time Allocation:** Encouraging professionals to set aside time for reflection-on-action supports deeper learning.

These interventions highlight that while reflection-in-action is spontaneous, it can be nurtured and refined through deliberate educational design.

Reflective Practitioner and Modern Professional Challenges

In today's fast-evolving workplaces, the ability to think in action is more crucial than ever. With rapid technological advancements and shifting societal expectations, professionals must continuously update their skills and adapt to novel situations. For example, in cybersecurity, threats evolve daily, requiring analysts to anticipate and respond creatively rather than rely solely on established protocols.

Moreover, the growing emphasis on interdisciplinary collaboration means that reflective practitioners must integrate knowledge from diverse fields and negotiate complex social dynamics. This highlights the intersection between technical expertise and emotional intelligence in professional thinking.

Technology's Impact on Reflective Practice

While technology offers tools that can support reflection—such as data analytics, decision support systems, and digital learning platforms—it can also pose distractions that impede deep thinking. Professionals need to balance the use of these aids with maintaining mental presence and critical awareness.

Additionally, artificial intelligence and automation raise questions about the future role of human reflection in professions. Although machines can process information rapidly, the nuanced judgment and ethical considerations inherent in reflection-in-action remain distinctively human attributes.

The reflective practitioner how professionals think in action remains a foundational concept for understanding expertise beyond static knowledge. It captures the fluid, context-dependent nature of professional work and underscores the value of cultivating adaptability and critical awareness. As workplaces become increasingly complex, embracing reflective practice will be essential for fostering resilient, innovative, and effective professionals across disciplines.

The Reflective Practitioner How Professionals Think In Action

the reflective practitioner how professionals think in action: The Reflective Practitioner

Donald A. Schön, 1983 A leading M.I.T. social scientist and consultant examines five professions - engineering, architecture, management, psychotherapy, and town planning - to show how professionals really go about solving problems. The best professionals, Donald Schön maintains, know more than they can put into words. To meet the challenges of their work, they rely less on formulas learned in graduate school than on the kind of improvisation learned in practice. This unarticulated, largely unexamined process is the subject of Schön's provocatively original book, an effort to show precisely how 'reflection-in-action' works and how this vital creativity might be fostered in future professionals.

the reflective practitioner how professionals think in action: *Handbook of Reflection and Reflective Inquiry* Nona Lyons, 2010-04-07 Philosophers have warned of the perils of a life spent without reflection, but what constitutes reflective inquiry - and why it's necessary in our lives - can be an elusive concept. Synthesizing ideas from minds as diverse as John Dewey and Paulo Freire, the *Handbook of Reflection and Reflective Inquiry* presents reflective thought in its most vital aspects, not as a fanciful or nostalgic exercise, but as a powerful means of seeing familiar events anew, encouraging critical thinking and crucial insight, teaching and learning. In its opening pages, two seasoned educators, Maxine Greene and Lee Shulman, discuss reflective inquiry as a form of active attention (Thoreau's wide-awakeness), an act of consciousness, and a process by which people can understand themselves, their work (particularly in the form of life projects), and others. Building on this foundation, the *Handbook* analyzes through the work of 40 internationally oriented authors: - Definitional issues concerning reflection, what it is and is not; - Worldwide social and moral conditions contributing to the growing interest in reflective inquiry in professional education; - Reflection as promoted across professional educational domains, including K-12 education, teacher education, occupational therapy, and the law; - Methods of facilitating and scaffolding reflective engagement; - Current pedagogical and research practices in reflection; - Approaches to assessing reflective inquiry. Educators across the professions as well as adult educators, counselors and psychologists, and curriculum developers concerned with adult learning will find the *Handbook of Reflection and Reflective Inquiry* an invaluable teaching tool for challenging times.

the reflective practitioner how professionals think in action: Readings for Reflective Teaching Andrew Pollard, 2002-01-01 This unique book provides the reader with a mini-library of over one hundred readings containing: --both classic and contemporary readings--international contributors--material drawn from books and journals An essential reference resource in its own right, *Readings for Reflective Teaching* also contains numerous cross-references to Andrew Pollard's *Reflective Teaching*.

the reflective practitioner how professionals think in action: *Strategie als Kunst des Möglichen* Torsten Schmid, 2005-10-25 Torsten Schmid setzt sich mit dem Management strategischer Initiativen in Grossunternehmen auseinander und analysiert die Erfolgspraktiken von Projektleitern in den Aufgabenfeldern Entwicklung einer Geschäftsidee, Organisation der Initiative und Prozessmanagement. Er entwirft ein realistisches und konstruktives Leitbild von Strategie als der Kunst des Möglichen, demzufolge ein pragmatisches Vorgehen, das sich auf mögliche Interventionen beschränkt, eine wichtige Grundhaltung der strategischen Führungskraft ist

the reflective practitioner how professionals think in action: Continuing Professional Development in Nursing Francis M. Quinn, 1998 This handbook offers practical guidance for everyone involved in professional development. Expert advice is provided on relevant aspects of nursing practice such as reflective practice and clinical supervision.

the reflective practitioner how professionals think in action: TEACHING STRATEGY ,
the reflective practitioner how professionals think in action: Professionalizing Your English Language Teaching Christine Coombe, Neil J Anderson, Lauren Stephenson, 2020-10-22 Written by leading experts in the field of TESOL, this book explores the literature on various topic areas and demonstrates how teachers can increase their levels of professionalism by acquiring some general and field-specific strategies. Being a teaching professional is not simply about having the right teaching qualifications and good academic standing, it involves a commitment to being innovative and transformative in the classroom and helping both students and colleagues achieve their goals. A dictionary definition of professionalism reads as follows: professionalism is the conduct, aims, or qualities that characterize or mark a profession or a professional person; and it defines a profession as a calling requiring specialized knowledge and often long and intensive academic preparation (Merriam-Webster, 2013). However, according to Bowman (2013), professionalism is less a matter of what professionals actually do and more a matter of who they are

as human beings. Both of these views imply that professionalism encompasses a number of different attributes, and, together, these attributes identify and define a professional. The book is primarily intended for teachers at all levels and in all contexts who are interested in improving their professionalism and developing strategies that can take them to higher levels in the field of TESOL/ELT.

the reflective practitioner how professionals think in action: The Professional Development of Early Years Educators Jane Waters, Jane Payler, Ken Jones, 2019-07-23 This book provides a critical insight into comparative approaches to the professional learning and development of early years educators – taken to include all those working in a professional capacity with young children in educative settings, including home-based care and education. It also analyses leadership development for the early years workforce, and the evaluation of the success or otherwise of professional development initiatives involving early years educators. The book includes perspectives on relevant policy development at local and national levels and critical consideration of research literature on the effectiveness of professional development programmes for early years educators. The book is essential reading for professionals working in early years settings, for those engaged with the professional learning of early years educators, and for academics researching professionalism in early years education. It provides international perspectives on the professional learning and development of those working in early years education. This book was originally published as a special issue of the journal Professional Development in Education.

the reflective practitioner how professionals think in action: Teaching Music Performance in Higher Education Helen Julia Minors, Stefan Östersjö, Gilvano Dalagna, Jorge Salgado Correia, 2024-05-27 Higher Music Performance Education, as taught and learned in universities and conservatoires in Europe, is undergoing transformation. Since the nineteenth century, the master-apprentice pedagogical model has dominated, creating a learning environment that emphasises the development of technical skills rather than critical and creative faculties. This book contributes to the renewal of this field by being the first to address the potential of artistic research in developing student-centred approaches and greater student autonomy. This potential is demonstrated in chapters illustrating artistic research projects that are embedded within higher music education courses across Europe, with examples ranging from instrumental tuition and ensemble work to the development of professional employability skills and inclusive practices. Bringing together diverse and experienced voices working within Higher Music Education but often also as professional performers, this edited collection pairs critical reflection with artistic insight to present new approaches to curricula for teaching interpretation and performance. It calls for greater collaboration between Higher Education and professional music institutions to create closer bonds with music industries and, thereby, improve students' career opportunities. Teaching Music Performance in Higher Education will appeal to scholars, performers, teachers, but also students whose interests centre on innovative practices in conservatoires and music departments.

the reflective practitioner how professionals think in action: Developing Professional Practice in Health and Social Care Adam Barnard, 2017-07-14 Addressing the changing world of professionalism, this text combines theory, research and practice, using real case studies, to investigate the process of becoming professional. Mapping the journey from allied or associate practitioner positions through qualifying and into advanced practitioner status, it is a valuable companion for health and social care, social work and allied health students from the beginning of their studies. Developing Professional Practice in Health and Social Care is an accessible text, including case studies, reflective exercises and activities, chapter aims and summaries and further reading boxes throughout. It covers: the context for professional practice, including historical perspectives, policy and discussion of relevant competencies and frameworks the concept of professionalism, exploring what it means to be a professional values and ethics underpinning professional practice professional identity development, including formation and changes in identity professional practice in complex environments, paying particular attention to working in organisations becoming a critical and globally aware practitioner the role of evidence and

knowledge in professional practice working with supervision. Maintaining a strong focus on the ethical dimensions of professional practice, this text emphasises how health and social care practitioners can contribute to social justice and challenge social exclusion.

the reflective practitioner how professionals think in action: Social Work Vivienne E. Cree, Trish McCulloch, 2023-04-04 Building on the successful 1st edition, this reader brings together some of the most significant ideas that have informed social work practice over the last fifty years. At the same time as presenting these foundational extracts, the book includes commentaries that allow the reader to understand the selected extracts on their own terms as well as to be aware of their relations to each other and to the wider social work context. There is no settled view or easy consensus about what social work is and should be, and the ideas reflected in this volume are themselves diverse and complex. The world of social work has changed greatly over the last ten years, and this new edition reflects that change with new material on the decolonisation of social work knowledges, the greater emphasis on inter-disciplinarity and co-production and the new concern for identities. With an accessible introduction to contextualise the selections, the book is divided into three main sections, each presenting key texts drawn from a wide range of perspectives: psychological, sociological, philosophical, educational and political, as well as perspectives that are grounded in the experiences of practitioners and those who use services, which have contributed to the development of: the profession of social work knowledge and values for social work and practice in social work. By providing students and practitioners with an easy way into reading first-hand some of the most interesting, foundational texts of the subject, it will be required reading for all undergraduate and postgraduate programmes and professionals undertaking post-qualifying training.

the reflective practitioner how professionals think in action: Decision-Making in Midwifery Practice Maureen D. Raynor, Jayne E. Marshall, Amanda Sullivan, 2005-06-01 The book looks at a broad perspective of decision making and each chapter focuses on a specific aspect related to making crucial decisions. Following an initial introduction the book explores the concept of autonomy and the many factors that influence autonomous practise. The role of knowledge in decision making, using evidence to inform decisions, as well as different approaches to decision making are also examined - including the traditional or rational approach, decision analysis and the development of professional judgement. Dilemmas arise when decisions are made and therefore ethical decision making is an important component of this book. Management decisions may be different from those related to giving specific care to women, hence one chapter focuses on making management decisions. Emphasis is also placed on the role of the midwife in helping women make their own decisions, the role of reflection in enhancing the decisions midwives make and the support midwives can receive from their Supervisor of Midwives. Flowcharts explain and facilitate the decision-making process. A very practical approach to decision-making in midwifery, with contributions from midwives who have considerable experience in this area Provides guidelines on how to achieve successful autonomous midwifery practice, enabling theory to be effectively applied to practice Includes coverage of management roles and decision-making as well as clinical scenarios, offering frameworks and flowcharts to guide the inexperienced Suggests different approaches to making difficult decisions

the reflective practitioner how professionals think in action: Getting into Secondary Teaching Andy Davies, Melanie Norman, 2025-02-28 This book is essential reading if you are considering making an application for secondary initial teacher education or preparing to begin your programme. It introduces you to a range of perspectives on teaching and teacher education and guides you through the application process to ensure you choose the training route that's right for you to achieve a successful outcome. Key chapters cover pathways into secondary teaching, professional learning, developing as a subject specialist, classroom management and working with young people. Useful features such as jargon busters, progress checklists and case studies make the material accessible and help you navigate the 'new landscape' of teacher education. In addition the text encourages you to reflect critically on your school experiences of learning and teaching and

uses example of theory, research and practice to help you develop an informed stance on important themes within secondary education.

the reflective practitioner how professionals think in action: *The SAGE Encyclopedia of Action Research* David Coghlan, Mary Brydon-Miller, 2014-08-11 Action research is a term used to describe a family of related approaches that integrate theory and action with a goal of addressing important organizational, community, and social issues together with those who experience them. It focuses on the creation of areas for collaborative learning and the design, enactment and evaluation of liberating actions through combining action and research, reflection and action in an ongoing cycle of cogenerative knowledge. While the roots of these methodologies go back to the 1940s, there has been a dramatic increase in research output and adoption in university curricula over the past decade. This is now an area of high popularity among academics and researchers from various fields—especially business and organization studies, education, health care, nursing, development studies, and social and community work. The SAGE Encyclopedia of Action Research brings together the many strands of action research and addresses the interplay between these disciplines by presenting a state-of-the-art overview and comprehensive breakdown of the key tenets and methods of action research as well as detailing the work of key theorists and contributors to action research.

the reflective practitioner how professionals think in action: Early Professional Development for Teachers Frank Banks, Ann Shelton Mayes, 2001 First Published in 2002. Routledge is an imprint of Taylor & Francis, an informa company.
