a rose for emily multiple choice questions and answers: *The Nature of Literary Response*
Clark McPhail, Norman Holland, 2017-07-12 In a rare fusion of literary sensibility with psychological research, Norman N. Holland brings to light important data showing how personality—in the fullest sense of character development and identity—affects the way in which we read and interpret literature. This book will show that readers respond to literature in terms of their own lifestyle, character, personality, or identity. By such terms, psychoanalytic writers mean an individual's characteristic way of dealing with the demands of outer and inner reality. Each new experience develops the style, while the pre-existing style shapes each new experience. The sub-title of this book, *Five Readers Reading*, reflects the fact that the author, a distinguished literary critic, worked with five student readers, using a battery of psychological tests and extensive interviews to study the ways they reacted to classic short stories by Faulkner, Hemingway, and others. Combining his own interpretation of the stories with his understanding of the readers and their reactions, Holland derives four principles that inform literary response. He then goes on to show how these principles apply, not just to literary response, but to the way personality shapes any experience. The book carries Holland's previous studies of creation and responsive recreation forward to a major theoretical statement. He rejects the artificial idea that one must think of a text (or other event) as separate from its perceivers, illustrating the dynamics by which perceiver and perceived mutually create an experience. For critics and students of the psychology of human behavior, this is challenging and seminal reading.

a rose for emily multiple choice questions and answers: The Crafty Reader Robert Scholes, 2008-10-01 "I believe that it is in our interest as individuals to become crafty readers, and in the interest of the nation to educate citizens in the craft of reading. The craft, not the art. . . . This book is about that craft."—from the Introduction This latest book from the well-known literary critic Robert Scholes presents his thoughtful exploration of the craft of reading. He deals with reading not as an art or performance given by a virtuoso reader, but as a craft that can be studied, taught, and learned. Those who master the craft of reading, Scholes contends, will justifiably take responsibility for the readings they produce and the texts they choose to read. Scholes begins with a critique of the New Critical way of reading ("bad for poets and poetry and really terrible for students and teachers of poetry"), using examples of poems by various writers, in particular Edna St. Vincent Millay. He concludes with a consideration of the strengths and weaknesses of the fundamentalist way of reading texts regarded as sacred. To explain and clarify the approach of the crafty reader, the author analyzes a wide-ranging selection of texts by figures at the margins of the literary and cultural canon, including Norman Rockwell, Anaïs Nin, Dashiell Hammett, and J. K. Rowling. Throughout his discussion Scholes emphasizes how concepts of genre affect the reading process and how they may work to exclude certain texts from the cultural canon and curriculum.

a rose for emily multiple choice questions and answers: Types Zemach, 2021-11-01 This book consists of a series of applications to ontology, the philosophy of mind, and aesthetics, of two nominalistic theses: first, that all the things we encounter (houses, cats, people, symphonies, and also hair, milk, red, and love) are types, and second, that things are ontologically incomplete. Types are material things that recur at several indices, at which they are identical with other things; thus in this world Man=Mortal, and today Jane=Happy. The Jupiter Symphony is a material thing that recurs at various times at homes and concert halls. Like all things it is ontologically incomplete (it is undetermined with respect to some properties); therefore it can be interpreted, that is, be identical with some things more complete than it is. Using these ideas new, simple and metaphysically frugal solutions are offered to a plethora of questions that have beset philosophy ever since Plato.

a rose for emily multiple choice questions and answers: Silent Statements Michal Beth Dinkler, 2013-10-14 Even a brief comparison with its canonical counterparts demonstrates that the

Gospel of Luke is preoccupied with the power of spoken words; still, words alone do not make a language. Just as music without silence collapses into cacophony, so speech without silence signifies nothing: silences are the invisible, inaudible cement that hold the entire edifice together. Though scholars across diverse disciplines have analyzed silence in terms of its contexts, sources, and functions, these insights have barely begun to make inroads in biblical studies. Utilizing conceptual tools from narratology and reader-response criticism, this study is an initial exploration of largely uncharted territory – the various ways that narrative intersections of speech and silences function together rhetorically in Luke’s Gospel. Considering speech and silence to be mutually constituted in intricate and inextricable ways, Dinkler demonstrates that attention to both characters’ silences and the narrator’s silences helps to illuminate plot, characterization, theme, and readerly experience in Luke’s Gospel. Focusing on both speech and silence reveals that the Lukan narrator seeks to shape readers into ideal witnesses who use speech and silence in particular ways; Luke can be read as an early Christian proclamation – not only of the gospel message – but also of the proper ways to use speech and silence in light of that message. Thus, we find that speech and silence are significant matters of concern within the Lukan story and that speech and silence are significant tools used in its telling.
