ncic operating manual 2021: No-Body Homicides Mark Stobbe, 2023-05-05 No-Body Homicides: The Evolution of Investigation and Prosecution examines how police and prosecutors have become more successful in obtaining convictions for homicide when the remains of the victim are unavailable as evidence. Based on an examination of over 600 cases in the United States and Canada, this book shows the length some killers will go to avoid punishment and the determination of police and prosecutors to bring them to justice. For over 300 years, murderers in the United States and Canada could avoid prosecution by successfully disposing of the body of their victim.

No-Body Homicides provides the reader with a historical overview of prosecutions in which a killer destroyed or hid the body of the victim. It explains why prosecutions were once extremely rare, and how legal, attitudinal, and technical changes have made them more common. The book also explores how the logic of no-body homicide prosecutions differs from body-present homicides. It allows police and prosecutors to draw on the accumulated experience of hundreds of prosecutions. For criminology students, it provides fascinating insights into the process of investigating and prosecuting homicides – as well as a glimpse into the motivations and practices of killers who are so determined to avoid punishment that they remove the bodies of their victims. No-Body Homicides will be of practical interest to police or prosecutors confronted with a missing person's case that could be sinister. ncic operating manual 2021: Wisconsin in the World Elise S. Ahn, 2023-07-01 During the 2020 and 2021 phases of the global COVID-19 pandemic, there was significant prognostication regarding what internationalization in higher education would look like in its aftermath. Within the field of international education, many stated the need to reimagine internationalization in and of higher education in the face of severe budget cuts, restrictions on travel, and increased government protectionism in the face of growing nationalistic populism globally to name a few challenges. Absent from many of those discussions, however, were the voices of many leader-practitioners who have had to think flexibly about internationalization in higher education in order to sustain and grow

programs throughout the last 20 years despite numerous exogenous factors, e.g., earlier economic recessions and viral outbreaks, along with endogenous factors like internal leadership transitions and institutional reorganizations. *Wisconsin in the World* explores how internationalization at the University of Wisconsin–Madison (UW) has been a decades-long, ongoing endeavor. Against that backdrop, the various chapters also provide a snapshot of how people across the UW campus were reflecting on their work amidst the COVID-19 pandemic and on the implications of the pandemic regarding the future of campus internationalization. The book is organized into four overarching sections—internationalization of the curriculum (general and language); experiential learning (co-curricular engagement and education away); establishing linkages (institutional and outreach); and administration. To highlight the expansive way campus units have been engaging in internationalization, a wide-ranging set of chapter case studies have been included. Although not exhaustive, this volume does provide a robust cross-sectional view into internationalization at UW. For international education scholars and practitioners then, a number of the chapters also highlight areas that may warrant further engagement and exploration moving forward. Finally, by examining how internationalization at UW has been informed by the Wisconsin Idea, this book explores how institutional internationalization strategies can align with and be tailored to institutional values for long-term sustainability. In addition to the 34 chapters focusing on different units and programs at UW, *Wisconsin in the World* also includes a number of contributions from colleagues at other institutions. Each section has a lead-in chapter which provides an overview of the scholarship in that particular area and/or a concluding chapter from a scholar-practitioner situating the UW “cases” in relation to their own work. The intention of structuring the book this way was to facilitate a dialogue among UW colleagues, across institutions, and with the scholarship in the field. The target audience for *Wisconsin in the World* includes practitioners or scholar practitioners in the field of international education (study abroad, education away, internships, partnerships, program development), as well as faculty and students in global higher education or comparative and international education graduate programs. Additionally, this volume may be of general interest for any higher education administrator who may not have a background in international education but may become responsible for programs and support within a school or college context (e.g., a dean or department chair).

ncic operating manual 2021: Responding to Violent and Hateful Extremism Anthony Ware, Leanne M. Kelly, Greg Barton, 2024-09-06 This book surveys the state of knowledge regarding development and humanitarian non-government organisation (NGO) responses to preventing and countering violent extremism (P/CVE). It delineates the nexus and shared objectives between P/CVE and development/humanitarian NGO frameworks and outlines a reframing of the concept of VE into violent and hateful extremism (VHE) as a shift to a more nuanced understanding which addresses inherent complexities and entanglements more deeply. The diversity of case studies, datasets, and author perspectives serves to advance knowledge on this topic and provide useful evidence and insights to inform policy and practice. This book will be a valuable resource for students, academics and professionals interested in international humanitarian, development operations and conflict resolution. The chapters in this book were originally published as a special issue of *Conflict, Security & Development*.
